

Java

```
class Solution {  
    public String mostCommonWord(String paragraph, String[] banned) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} paragraph  
 * @param {string[]} banned  
 * @return {string}  
 */  
var mostCommonWord = function(paragraph, banned) {  
  
};
```

TypeScript

```
function mostCommonWord(paragraph: string, banned: string[]): string {  
  
};
```

C++

```
class Solution {
```

```
public:
    string mostCommonWord(string paragraph, vector<string>& banned) {

    }
};
```

C#

```
public class Solution {
    public string MostCommonWord(string paragraph, string[] banned) {

    }
}
```

Kotlin

```
class Solution {
    fun mostCommonWord(paragraph: String, banned: Array<String>): String {

    }
}
```
